

# MSc Logistics and Supply Chain Management

# Introduction:-

1. MSc in Supply Chain Management and Logistics addresses the growing demand for highly trained individuals by seeking to develop professionals with up-to-date knowledge, skills and capabilities in the key areas of strategic supply chain management, logistics, distribution, sourcing, procurement, finance, contracts, project management, forecasting and environmental management.
2. This course aims to introduce the most current practices and concepts of supply chain management and logistics (SCML), combining them with a solid grounding in core management subjects. You should develop the skills and expertise to think critically, analyse problems and make informed recommendations.
