

MSc in International Supply Chain and Logistics Management

Cardiff
Metropolitan
University

Introduction:-

This course provides for advanced study in the field of Supply Chain and Logistics Management. It aims to provide managers, engineers, and business specialists with key insights into production systems that operate in a wide range of organizations. Specifically, the objectives of this course are:

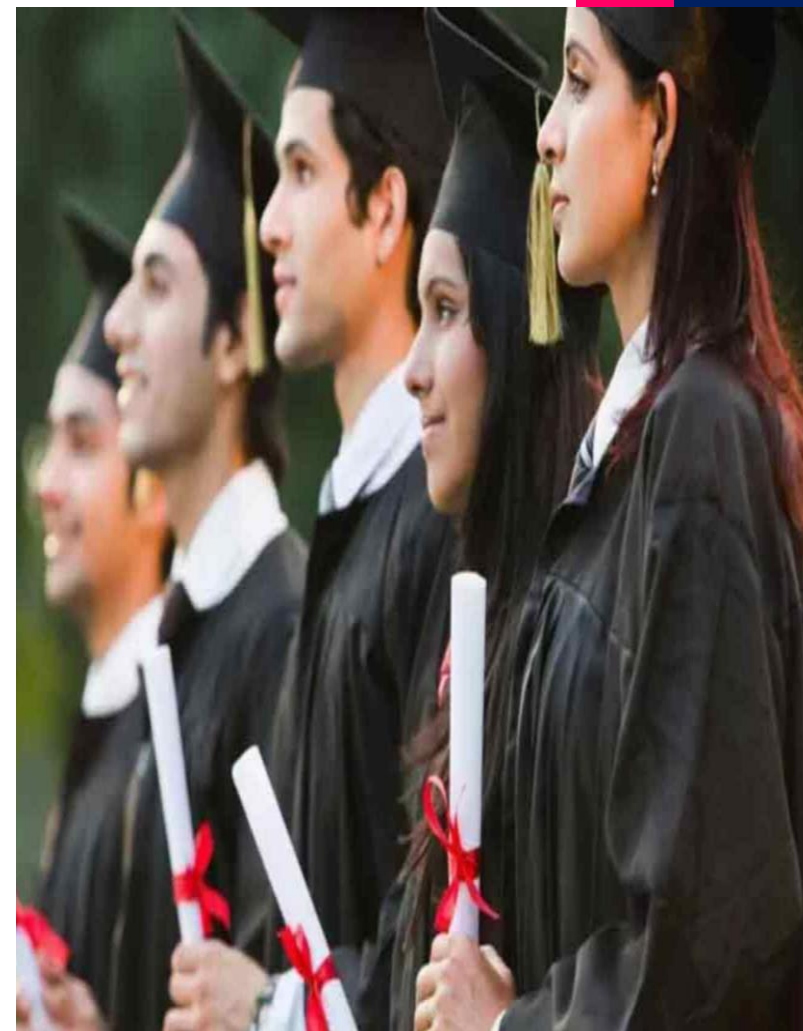

1. To develop Supply Chain and Logistics Management theory at a professional level where it will also provide for a sound preparation for research or further study in the area
2. To develop and apply key knowledge and understanding of Supply Chain and Logistics Management theory to complex systems, both systematically and creatively, to improve supply chain and logistics management practice
3. To enhance independent and high-level learning skills and personal development so that learners are able to work with self-direction and originality and contribute to the discipline of Supply Chain and Logistics Management.
