

MSc in Global Logistics and Supply Chain Management

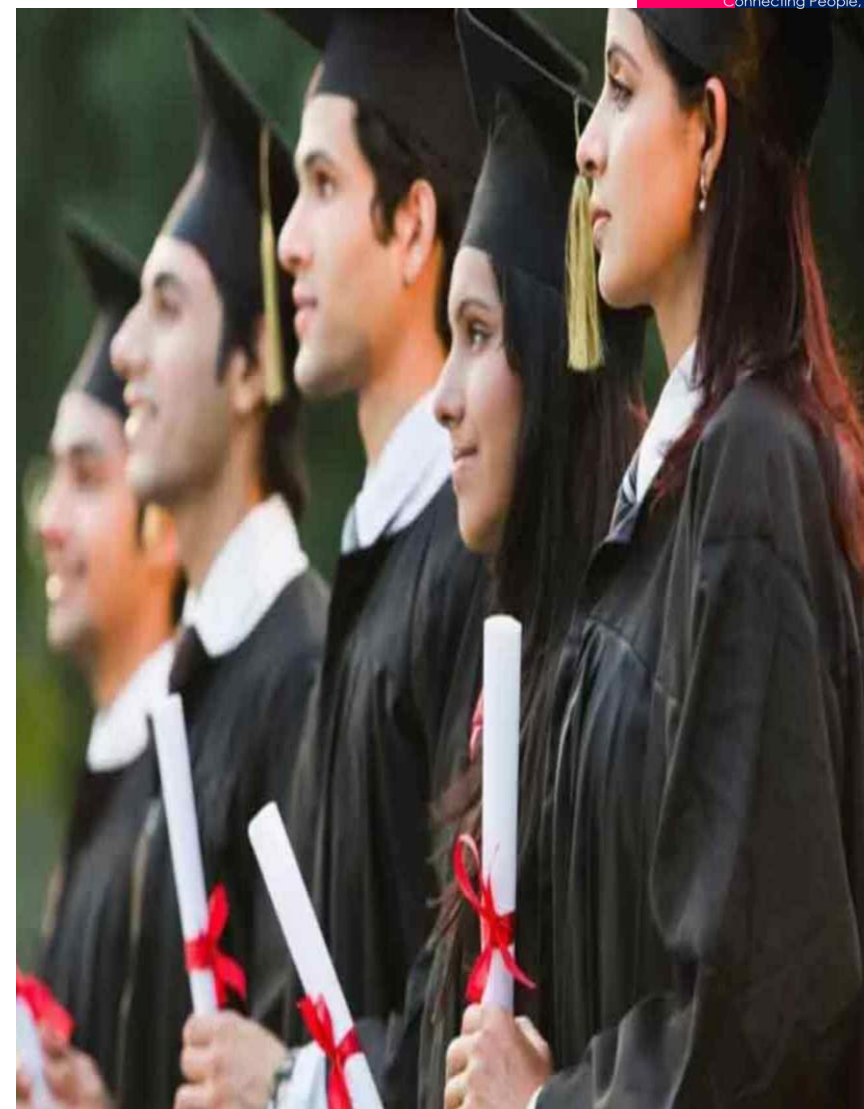

Introduction:-

- With the climate crisis threatening the future of our planet, companies are moving to make their global supply chains more sustainable, ethical, and resilient without weakening their competitiveness. The MSc in Global Logistics and Supply Chain Management will prepare students to take on this challenge
- Supply chains draw together all of the activities required to deliver goods or services to a consumer, from sourcing raw materials to production, marketing, and delivery, and are a fundamental element of all businesses. On this degree, students will learn how to manage this process
- You will develop an understanding of all of these processes and of the different roles people in the chain play and how these work to deliver the product or service
- You will explore the use of accounting, budgetary, and other information systems in
