

MSc Logistics and Supply Chain Analytics

Introduction:-

- Gain the expertise to manage the movement of goods, people, data, or money across a supply chain on this master's degree course at the University of Southampton. You'll develop advanced management and analytical skills, and have the chance to work on a real business project during a 3-month industry placement. You'll be taught by academics from one of the country's leading analytics research groups, and graduate with the skills and knowledge for a successful career in logistics.
- On this MSc Logistics and Supply Chain Analytics degree, you'll learn advanced management skills and the ability to use data to make good business decisions. You'll gain a thorough grounding in:
 - Integrated and international logistics supply chain management
 - Software and programming skills
 - Quantitative, qualitative, and technical skills
- You'll graduate from the course knowing how to:
 - Formulate a hypothesis and use data to test it
 - Use analytical techniques to support decision making
 - Develop computer-based decision support systems to gain insight from data
